

## Resume

Personal information	<p><b>Name:</b> Marco Aurelio Moncada Coello</p> <p><b>Date born:</b> On June 25, 1965</p> <p>Tel. (55) 91485755 (house), cel. 044 55 19202224</p> <p>English 70 %</p> <p>My experience is based in 23 years, and speciality programmer / analyst.</p> <p>Marco.aurelio@moncada.com.mx</p> <p>The wished area is systems asks and responsibilities: programming, analysis, database mysql, OS linux, web pages PHP perl</p> <p>Supervision of analysis, expert programming, application support and support programs product. My experience in analysis, decision making, and automation software products. And do I have the experience and knowledge necessary for the support and application design computing.</p>
<b>Academic</b>	<p><b>Technical Professor in Electronic of data's.</b> Instituto De Computación y Mecanización 1985(ICM) <b>Enep Acatlan</b>(fes)(2002-2004) <b>Lic. Applied mathematics and Computation</b></p>

<b>Formation</b>	<i>ICM de México</i> <i>January 1983 – December 1985</i>	Language Rpg 2
		Language Assembler
		<i>Language Cobol</i>
		Language Basic
	EDS de México <i>October 1986 – February 2001</i>	<i>Language Cobol in Datacom</i>
		Language Cobol Cics
		<i>Leader and Learning</i>
		Integration of teams of high performance(Leader and Learning)
		Language Pl1
		Language Cobol with Db2
	<i>ENEP Acatlán</i> <i>September 2002 – October 2004</i>	Licentiate in Applied Mathematics and Computation: Language Pascal
		Language C++
	Language C

database sql/db2

**Bancomer**

March 2012 – September 2014

Creation and maintenance of own systems and system programs  
and finances afore

**Internet Moncad @ 'S System (consultant)**

January 2012 - January 2012

Tasks and responsibilities: analysis, programming PHP,  
perl, html, java, Javascript, .net, Development, database  
sql/db2, oracle/db2, OS linux, Online Billing

**Plásticos Sa de Cv**

November 2010 - January 2011

Tasks and responsibilities: payroll application, tax, isr, sar,  
analysis, development, programming language cobol, PHP,  
perl, html language, java language, Javascript language,  
language. Net, database oracle/db2, sql/db2, OS linux

**vidrios SA de CV**

August 2011 - November 2011

Tasks and responsibilities: cabling, network, server  
administration, Customization, OS linux

**vidrios SA de CV**

January 2011 - June 2011

Tasks and responsibilities: network, cabling, server  
administration, Customization, OS linux, analysis, reports,  
development, programming COBOL, pascal language,  
database sql/db2, oracle/db2, operating systems linux,  
mainframe

**vidrios SA de CV**

October 2010 - November 2010

Tasks and responsibilities: development, Server  
Customization Print, records, applications, OS  
windows, linux, Courses, applications

**Internet Moncad @ 'S System (consultant)**

September 2010 - November 2010

Tasks and responsibilities: web pages, html language, perl, Javascript language, java language, database mysql, Operating system windows

**plasticos SA de CV**

July 2010 - November 2010

Tasks and responsibilities: analysis, programming, PHP, html language, perl, development, web pages, services, reports on-line, intranet, material acquisition, users, suppliers, furniture, costs, database sql, db2, Operating system windows

web page creation, for catalogs, products, inventory, registration, as well as the dynamic update server in perl

**plasticos y vidrios sa de cv**

February 2010 - June 2010

Tasks and responsibilities: analysis, programming, pascal language, development, OS windows

creation of the system, as payroll, in a small mainframe applications tax, creation of user list, age dates, and anniversaries

**Internet Moncad@'S System**

November, 2001 – January, 2010

Area: Systems, IT, MY, Teleco.

Tasks and responsibilities: Basically Services of Calculation and Internet coffee

Manager, service, maintenance and systems of programming. In all the languages of which I have knowledge, I have offered service in centers of information of some companies of displays, plastic, glasses, etc., in the different languages, Cobol, Pascal, C, the development of web pages, with the facility of database: Db2, Sql, Oracle, Datacom, etc. As well as operator in a center of information of automobiles. Where I offer the following thing:

## Installation

- ▣ Administration of center of data's
- ▣ Operating systems
- ▣ Mainframe, Mvs/Xa, esa/390, Mvs/esa, os/dos, os/390.
  - Linux
  - Windows
- Database: MySQL, DB2, SQL, DATACOM, ORACLE.
- Programming: Cobol, Pascal, c, c, Php, perl, Html, JavaScript, Rpg2, Assembler, Basic.
- Network
  - Wired up
  - Installation of machines
- Customización of center of data's
- Services Customización
- Customización of machines
- Administra
- 

### **Internet Moncad @ 'S System (consultant)**

June 2012 - September 2012

#### Tasks and responsibilities:

- programming
- analysis
- database mysql
- OS linux
- web pages PHP perl
- Administration of protocols
- Administration of center of data's
- Users' administration
- Administration of files
- Administration of impression

	<ul style="list-style-type: none"> <li>- Administration of protocols</li> <li>- Administration of web pages and Generation of web pages  <b>@cselco</b>  February, 2001 - October, 2001  Selling on products of PC (personnel computer),  monitoring, of applications, and activities of the micro  processor   Locality Mexico DF.</li> </ul> <p style="text-align: center;"><b>EDS/GENERAL MOTORS, AEROMEXICO, CITY BANK,  MEXICANA DE AVIACION</b>  March, 1991 - February, 2001  Technical support (Endevor, Champs, Acf2, Database, Smf,  Net, Cics, Ims) and programming of different reports of the  operating system Mvs/Xa, Mvs/esa, Mvs/360, Mvs/370 in  IBM, Hitachi, etc., in Cobol with database Datacom and  db2, Easytrev, Data Query, Jcl, Tso, Ispf, Cics   Locality Ramos Arizpe, Coahuila and Mexico DF.</p> <p style="text-align: center;"><b>EDS/GENERAL MOTORS, AEROMEXICO, CITY BANK,  MEXICANA DE AVIACION</b>  February, 1989 - March, 1991  Supporting the systems of materials, costs, accounts for  you paying, foreign accounts, asdls, etc, and developing  new programs in Cobol and pl1 with database Datacom  and db2, Easytrev, Data Query, Jcl, Tso, Ispf, Cics   Locality Ramos Arizpe, Coahuila.</p> <p style="text-align: center;"><b>EDS/GENERAL MOTORS</b>  October, 1986 - February, 1989  Programming in Cobol and analisis of the systems of  selling, costs, control of units with database Datacom and  db2, Easytrev, Data Query, Jcl, Tso, Ispf, Cics   Locality Mexico DF.</p> <p style="text-align: center;"><b>IDESA/GENERAL MOTORS</b>  -  March, 1984 - October, 1986</p> <ul style="list-style-type: none"> <li>- Programming in Cobol and analisis of the systems of  selling, costs, control of units with database Datacom  and db2, Easytrev, Data Query, Jcl, Tso, Ispf, Cics  Locality Mexico, DF.</li> </ul>
<b>Projects</b>	<b>Risk (DRP)</b>

Initials in English Disaster Recovery Plan.  
Plan in case of disaster, to prepare and to determine the applications, the way of endorsing them. As well as to recover them in a little time, and with the minor lost.

Support of disc.

To obtain at last level, the programming,

Support operating system,

Support of Database.

To document the suggested changes, for him network,

To document the form of support and the method of restoration

### **Elimination of login-id's x Net-id's.**

For every application, **CICS, IMS, TSO, NETWORK, DATA BASES, etc.**

A login is had - go, the control of change of password, as well as the control of accesses, and the different names of login-id's. It involves a constant memory and the possibility of some fraud.

To prepare the plan,

To determine the changes of access,

To determine the changes of security

To determine the possible changes to files,

To involve the client, as well as to train it,

To determine the possibility and the plan of risk,

To document the solution,

To document the possible changes,

To continue the plan.

### **Units of import (uim)**

To determine and to scopes the project,

To prepare the plan,

To determine the changes to files,

To determine the progress,

Making of the programming in batch, as on line.

To determine the quantity of programs and involved changes,

To document the programming, and the suggested changes,

Making and effectiveness of the solution,

To document the project.

### **Migration to center of data's Dallas**

To obtain support of important applications, to document changes, to prove the correct accesses, to request changes to Acf2, Racf, to coordinate the change, and to support at

last level the changes, to document changes in the network, to verify effect, support to the last changes, to administer the changes to production, to direct the migration

### **Migration of center of information**

To request place, to avoid the changes of temperature, to verify of changes and gas installation pull, to verify the conectividad of the hardware, to verify the configuration, Installation of the corporate applications, installation and cross-check of the system mvs, etc.
