

Exercise: Sessions and Cookies

This exercise must show 3 different screens.

Screen 1: Data entry

On the first screen we will ask the user:

- Username.
- Profile image.
- Favourite colour.
- Province of residence.

The page will have two buttons below: one to access the favourite colour screen and another one to access the province of residence screen. The number of pages that have been visited so far will also be displayed.

Screen 2: Colour

On the second screen we will show the username and the image of the user entered on the first screen, as well as the user's favourite colour and the number of pages visited.

We will also display two buttons: one to access the first screen (data entry) and another one to access the province screen (screen 3).

Screen 3: Province

On the third screen we will show the username and the profile user's image, as well as the user's residence province and the number of pages visited.

We will also have two buttons: one to access each of the other two pages.

Additional Requirements

The username will be saved in a cookie. The rest of the data will be saved through sessions. Regarding the user's image loaded, you should verify it is a correct image (reasonable file size and extension) before storing it in its final path.
